

TRILLION  
ENERGY

## ▶ ABOUT TRILLION ENERGY

Trillion Energy is a trading house incorporated in Singapore and Indonesia. We specialize in the physical trading of Marine Fuels/Bunkers within Indonesia waters. Our team is made up of experienced personnel in the global Marine Fuels industry, all coming together to achieve new heights in bunkering in Indonesia.

We are part of a group of companies active in law practice, investments and entertainment. Our diverse network and business experiences provide us with an excellent platform for growth and sustainability.

Trillion is a growing business. It's not all about the bottom line. We were set up to introduce fresh ideas and global exposure to the local industry. All of your support contributes to our greater vision of building strong confidence in reliable bunkering in Indonesia.

## ► MISSION

Trillion Energy's mission is to be the preferred partner for bunkering in Indonesia.

## ► VALUES

### **Prices do not guarantee service quality; people do.**

In this challenging industry, competitive bunker pricing is fast becoming a point of parity. Our focus is to establish a point of difference with our service quality. We know a marginal edge is all you need, and we will help you achieve it.

### **Every enquiry is a step in the right direction.**

Good partners communicate. Each enquiry provides an entry point leading to a platform for mutual learning and constant improvement. We treat all your enquiries with the utmost care, for each order is a symbol of your faith in us.

### **We are not a postman; we provide solutions.**

Relaying accurate information is fundamental, and solving problems that crop up during the process is crucial. We give our very best to solve unanticipated problems and nullify preventable ones. Because we are in business with you as a team.

## ► BUNKERING IN INDONESIA

Indonesia has a coastline of 54,716 km (29,500 nautical miles), amongst the longest in the world. The Indonesian archipelago consists of over 17,000 islands that are rich in natural resources such as petroleum, gas, coal, tin, gold, and silver.

Undoubtedly, shipping is Indonesia's main vehicle for international trade. All types of International vessels call at Indonesia's ports, from bulk carriers to offshore vessels to cattle ships.

We provide you fuel for your ships to safely operate in Indonesia and depart for their next port of call. We understand the different requirements and operations of each type of vessel. We are familiar with the different conditions and restrictions of each port in Indonesia. With these knowledge, we are your best option for meeting your needs.

# INDONESIA
